Summary

BACHELOR: > INTEGRATED SAFETY AND SECURITY MANAGEMENT

Summary

- > Security in all of its aspects is an issue of increasing importance in our society, especially for critical infrastructure (like water, energy, etc.). The functioning and all respective critical infrastructure must be assured at all times, even in face of intentional threat or natural disaster.
- > Standardization can provide guidelines and methodologies to fulfill the tasks.
- > Corporate Security considers and defines the specific needs of the economic systems to contribute for security
- > Current and future challenges in this field can only be met by close cooperation of the officials, the first responders,, research institutions and business entities.
